

PAWGUARD

USER ROLE OPERATIONS

Step-by-Step Role Guides & Operational Procedures

Document Control	Value
Document Reference	UOM-PAWGUARD-2026-V1
Requirements Source	Project Requirement Report — PRR-PAWGUARD-2026-V1
PRR Issue Date	July 27, 2026
Issuing Entity	PawGuard Rescue & Adoption Operations Committee
Project	PawGuard Dog Rescue, Shelter Operations & Adoption Management Web Application
Manual Purpose	Operational guidance for role-based use of the PawGuard platform
Scope	Role responsibilities, workflows, data boundaries, security, and operational procedures
Source Policy	PRR is the sole requirements baseline for this manual

Document Purpose and How to Use This Manual

The PawGuard platform is designed as a centralized operational system connecting public services with rescue operations, veterinary care, shelter capacity, adoption, foster care, volunteer management, lost-and-found services, finance, inventory, vehicles/equipment, feedback, reporting, and governance.

The PRR requires granular Role-Based Access Control (RBAC): interfaces, functional permissions, data visibility, and contextual actions must adapt to the authenticated user's assigned operational role.

How to Use a Role Guide

1. Sign in using the account assigned to the role you are performing.
2. Open the role-tailored dashboard and confirm that the visible modules match your assigned responsibilities.
3. Follow the workflow section for the task you need to perform.
4. Enter complete, accurate operational information at the point where the work occurs.
5. Review the resulting status, record, or handoff before leaving the workflow.
6. Escalate issues through the appropriate operational role when the PRR assigns the next action to another role.

Role Catalog

#	Role	Primary Operating Scope
1	Super Administrator	System governance, RBAC, configuration, audit review, backups
2	Rescue Centre Admin	Operational strategy, facility oversight, compliance, approvals, escalation
3	Rescue Coordinator	Rescue verification, prioritization, dispatch
4	Rescue Agent	Field location, rescue execution, field observations, transport completion
5	Veterinarian	Clinical examinations, surgeries, prescriptions, medical clearance
6	Shelter Manager	Daily care, intake, kennel allocation, transfers, capacity
7	Adoption Coordinator	Application processing, vetting, interviews, follow-up
8	Foster Coordinator	Foster onboarding, inspections, placements, supplies
9	Volunteer Coordinator	Volunteer vetting, schedules, duty allocation, attendance
10	Inventory Manager	Stock, orders, expiry controls, vendor records
11	Finance User	Expenses, reconciliation, receipts, refunds
12	Volunteer	Duty acceptance, attendance, activity logging, feedback; self-service
13	Foster Family	Daily foster progress, symptoms, supplies, status updates; self-service
14	Donor	Contributions, dog sponsorship, tax receipts; self-service
15	General Public User	Emergency reports, adoption application, lost/found, inquiries; public self-service

1. Platform-Wide Operating Principles

1.1 Centralized Operational Record

- Use the PawGuard platform as the central operational record for work covered by the PRR.
- Keep rescue, dog, medical, shelter, adoption, foster, volunteer, finance, inventory, and vehicle records current at the point of activity.
- Use system status transitions and linked records rather than maintaining separate unofficial workflow states.

1.2 RBAC and Data Boundaries

- Access only the modules and records authorized for the authenticated role.
- Do not use another role's account to perform a task.
- Do not attempt to bypass role restrictions or access higher-tier operational views.

- Treat personal identifiers, financial records, rescue locations, and legal ownership information as sensitive operational data.

1.3 Field and Mobile Use

- Field-agent interfaces are required to be mobile responsive.
- Use touch-friendly controls and high-contrast data grids when operating in the field.
- When the platform provides location, photo, video, or evidence capture, verify that the information is attached to the correct operational record before submission.

1.4 Auditability

Critical transactions are expected to be audit logged. The PRR requires audit records to capture User ID, Timestamp, IP Address, Action Code, and Pre/Post State Data for critical system transactions.

1.5 Session and Security Hygiene

- Protect credentials and never share role accounts.
- End sessions when work is complete, especially on shared field devices.
- Follow enforced inactivity timeout, password, and authentication controls.
- Use only permitted file types and safe uploads; the PRR specifies JPEG, PNG, PDF, and MP4 as permitted types subject to system size/signature validation.

2. Super Administrator

The Super Administrator governs the platform, RBAC, global configuration, audit review, and backups.

Role Responsibility	Operational Boundary
System governance	Full unrestricted platform read/write/delete capabilities across all branches.
RBAC management	Controls role and permission configuration.
Audit review	Reviews critical transaction history and governance evidence.
Data backups	Performs/oversees backup responsibilities.

2.1 User and Role Governance

Use this procedure when governing access and permissions.

Step-by-Step Procedure

7. Open the user/role administration area available to the Super Administrator.
8. Identify the user account and confirm the intended operational role.
9. Review the permissions associated with the role before applying changes.
10. Apply only the role and permissions required for the user's operational responsibility.
11. Save the change and verify the resulting access state.
12. Confirm that the change is recorded in the system's audit trail where audit logging applies.

Completion Check

- The user has the correct operational role.
- No unnecessary higher-tier permissions are granted.
- The change is auditable.

2.2 Audit Review

Review critical system transactions and governance evidence.

Step-by-Step Procedure

- 13. Open the audit/log review capability.
- 14. Filter or locate the relevant critical transaction.
- 15. Review User ID, timestamp, IP address, action code, and pre/post state data.
- 16. Confirm that the recorded change corresponds to the operational event.
- 17. Escalate unexplained or unauthorized transactions according to organizational governance.

Completion Check

- Audit evidence is complete and traceable.
- Unauthorized or unexplained activity is escalated.

2.3 Backup Governance

Maintain the platform's backup responsibility.

Step-by-Step Procedure

- 18. Open the system backup/administration area.
- 19. Review the available backup status and most recent backup information.
- 20. Perform or initiate the backup procedure supported by the platform.
- 21. Verify successful completion and record the operational result.

3. Rescue Centre Admin

Oversees operational strategy, facility operations, compliance, high-level approvals, and escalations.

Role Responsibility	Operational Boundary
Operational oversight	Assigned shelter locations and rescue zones.
Approvals	High-level operational approvals within assigned scope.
Escalations	Manages operational escalation and compliance matters.

3.1 Monitor Rescue and Facility Operations

Use the operational dashboard to review active work within assigned locations/zones.

Step-by-Step Procedure

- 22. Open the operational dashboard for assigned shelter locations and rescue zones.
- 23. Review active rescue cases, facility conditions, and operational exceptions available to the role.
- 24. Identify items requiring approval, escalation, or compliance attention.
- 25. Open the relevant operational record and review its current status and supporting information.
- 26. Record or approve the action within the authorized workflow.
- 27. Verify the resulting status and any required audit entry.

3.2 Escalation Management

Handle issues escalated by operational teams.

Step-by-Step Procedure

- 28. Open the escalated case or operational item.
- 29. Review the case history, current status, notes, and supporting evidence.
- 30. Determine the required operational response within the role's authority.
- 31. Record the decision/action in the system.
- 32. Confirm that the affected operational team can see the updated status or escalation outcome.

4. Rescue Coordinator

Coordinates verification of public reports, severity prioritization, field-agent dispatch, vehicles, and rescue dispatch operations.

Role Responsibility	Operational Boundary
Rescue Module	Read/write access for rescue workflows.
Vehicle Module	Read/write access for dispatch resource coordination.
Dispatch Dashboard	Controls field dispatch and assignment activities.

4.1 Review and Verify a Rescue Request

Move a received rescue report through verification using the PRR lifecycle.

Step-by-Step Procedure

33. Open the incoming rescue queue and locate the report.
34. Review reporter information, incident location, GPS coordinates, animal condition, behavior indicators, media evidence, and notes.
35. Confirm whether the report is authentic and locatable.
36. If valid, record the verification decision and advance the case to VERIFIED.
37. If invalid, duplicate, or unlocatable, reject/archive the case and record the mandatory rationale.
38. Verify the unique rescue tracking key and current status.

Completion Check

- Required intake data is present.
- Valid cases are VERIFIED.
- Rejected cases contain a rationale log.

4.2 Prioritize and Dispatch

Assign field resources to a verified rescue case.

Step-by-Step Procedure

39. Open the verified rescue case in the dispatch control board.
40. Review severity, location, nearby field agents, vehicle status, and route-distance information.
41. Select the appropriate Rescue Agent or agents.
42. Link the appropriate Rescue Vehicle and specialized capture equipment where required.
43. Dispatch the case and confirm the status becomes DISPATCHED.
44. Monitor progress toward LOCATED, RESCUED, and ADMITTED.
45. Escalate when the field team requests backup, veterinary transport, or law-enforcement support.

Completion Check

- Dispatch resources match the incident.
- The case status and assigned resources are visible to the field team.

5. Rescue Agent — Field Operations Guide

The Rescue Agent is the primary field role for locating the animal, executing the rescue, recording observations/outcomes, and completing transport.

Role Responsibility	Operational Boundary
Assigned rescue cases	Mobile-optimized read/write access to assigned field rescue cases.

Role Responsibility	Operational Boundary
Transit logs	Read/write access to transport completion records.
Field tools	GPS navigation launch, reporter phone link, incident media reference, escalation triggers.

5.1 Accept and Prepare for a Dispatch

Start work on an assigned rescue case from the field interface.

Step-by-Step Procedure

46. Open the assigned dispatch from the field-agent interface.
47. Review the incident address, nearest landmark, GPS coordinates, animal condition, behavior indicators, reporter contact information, and available incident media.
48. Use the one-touch GPS navigation capability to navigate to the reported location.
49. Use the reporter phone link when operational contact is required.
50. Review the assigned vehicle/equipment and confirm readiness before departure.
51. If additional support is required, use the emergency escalation capability to request backup, specialized veterinary transport, or local law-enforcement support.

5.2 Locate the Animal

Record the field confirmation that the animal has been visually located.

Step-by-Step Procedure

52. Arrive at the reported location and assess the scene safely.
53. Confirm the animal matches the incident description and available media.
54. Record relevant field observations.
55. Update the rescue case to LOCATED when visual contact is confirmed.
56. Attach permitted field evidence where required by the workflow.

Completion Check

- The correct case is being updated.
- Location and field observations are recorded accurately.

5.3 Secure and Rescue the Animal

Complete the physical rescue and document the outcome.

Step-by-Step Procedure

57. Execute the rescue using the assigned personnel and capture equipment.
58. Record relevant field observations and any material changes in animal condition.
59. When the animal is successfully secured in the rescue vehicle, update the case to RESCUED.
60. Begin/continue the transit record for movement to the designated shelter.
61. If the rescue fails, select the applicable standardized outcome code.
62. Add supporting field notes for a failed rescue, including the circumstances that prevented completion.

Completion Check

- Successful rescue is recorded as RESCUED.
- Failed rescue has a standardized outcome code and supporting notes.

5.4 Complete Transport and Handover

Finish the field portion of the rescue lifecycle.

Step-by-Step Procedure

63. Transport the secured animal to the designated shelter facility.
64. Complete the transit/transport record.
65. Provide the shelter team with the rescue case reference and relevant field observations.
66. Confirm receipt at the designated facility.
67. Verify that the rescue case progresses to ADMITTED and that the internal Dog Master Profile is created by the system workflow.

Completion Check

- Transport completion is recorded.
- The shelter handover is confirmed.
- The case reaches ADMITTED where appropriate.

6. Veterinarian

Performs clinical examinations, surgeries, prescriptions, medical clearances, and adoption fitness checks.

Role Responsibility	Operational Boundary
Medical Module	Read/write access.
Isolation Registers	Read/write access.
Health Clearances	Read/write access.

6.1 Perform Clinical Intake Examination

Create the initial clinical record for an admitted dog.

Step-by-Step Procedure

68. Open the Dog Master Profile for the admitted animal.
69. Open the clinical intake examination.
70. Record body condition score using the 1–9 scale.
71. Record dental health, ocular/aural observations, coat condition, visible injuries, and initial triage diagnosis.
72. Save the clinical examination and verify it is attached to the correct dog.

6.2 Record Treatment and Surgery

Maintain the medical procedure history.

Step-by-Step Procedure

73. Open the dog's medical record.
74. Record the treatment or surgical procedure.
75. For surgery, record procedure type, anesthesia information, post-operative recovery notes, and attending veterinarian identity.
76. Save the medical event.
77. Verify the event appears in the dog's longitudinal history.

6.3 Manage Preventative Care and Medication

Maintain vaccination, deworming, parasite prevention, and medication records.

Step-by-Step Procedure

78. Open the dog's preventative-care or medication record.
79. Record core vaccinations such as DHPP and Rabies, deworming, or flea/tick prevention as applicable.
80. Record medication name, dosage, administration route, start/end dates, and active schedule when medication is prescribed.

81. Complete daily administration/sign-off records as required.
82. Review renewal or scheduled reminders and follow the due dates.

6.4 Issue Adoption Medical Clearance

Clear a dog for adoption only after the required clinical review.

Step-by-Step Procedure

83. Review the dog's current medical record and treatment history.
84. Confirm required clinical information is complete.
85. Perform the required adoption fitness assessment.
86. Record the formal medical clearance.
87. Verify that the dog is eligible to be flagged as Adoptable only after veterinarian authorization.

Completion Check

- Clearance is recorded by an authorized veterinarian.
- Adoptable status is not granted without required clearance.

7. Shelter Manager

Manages daily care, intake logs, kennel allocation, section transfers, and capacity across assigned facilities.

Role Responsibility	Operational Boundary
Shelter Facility Module	Read/write access.
Kennel Mapping	Read/write access.
Intake Logs	Read/write access.

7.1 Receive and Record an Admission

Complete shelter intake after a rescue transport arrives.

Step-by-Step Procedure

88. Locate the rescue case and confirm the transport/handover information.
89. Receive the animal at the designated facility.
90. Complete the intake record and verify the internal Dog Master Profile exists.
91. Place the dog into the appropriate operational section based on current care requirements.
92. Assign an available kennel using the kennel allocation workflow.
93. Confirm the kennel state and the dog's current location.

7.2 Manage Kennel Allocation and Capacity

Maintain accurate facility occupancy and prevent double booking.

Step-by-Step Procedure

94. Open the facility and kennel map.
95. Review current occupancy by section.
96. Select an available kennel appropriate to the dog's status.
97. Confirm the kennel is in an allocatable sanitation state.
98. Allocate the kennel to the dog.
99. Verify that occupancy and capacity figures update correctly.
100. When a kennel requires cleaning, move it through the supported sanitation state rather than reallocating it prematurely.

7.3 Record Daily Care

Maintain the daily care operational register.

Step-by-Step Procedure

- 101.Open the dog's daily care record.
- 102.Record feeding and special dietary requirements.
- 103.Record exercise and behavioral enrichment activities.
- 104.Record cleaning/rotation activity as applicable.
- 105.Review exceptions requiring medical or operational attention.
- 106.Save and verify the day's care record.

7.4 Transfer a Dog Between Facilities

Record an inter-facility movement with sender and receiver confirmation.

Step-by-Step Procedure

- 107.Open the dog's current facility record.
- 108.Initiate the inter-facility transfer workflow.
- 109.Select the receiving facility/partner.
- 110.Record the transfer details required by the workflow.
- 111.Confirm the sending-side handover.
- 112.Obtain/record receiving-side confirmation.
- 113.Verify the Dog Master Profile shows the new current location.

8. Adoption Coordinator

Processes adoption applications, applicant vetting, interview scheduling, home inspections, approvals, handover, certificates, and post-adoption audits.

Role Responsibility	Operational Boundary
Adoption Module	Read/write access.
Applicant Verification	Read/write access.
Follow-up Logs	Read/write access.

8.1 Process a New Adoption Application

Move an application through the controlled six-phase pipeline.

Step-by-Step Procedure

- 114.Open the submitted adoption application.
- 115.Complete Phase 1: document and identity verification.
- 116.If the applicant fails required verification, reject/archive the application with the applicable record.
- 117.For a verified applicant, proceed to Phase 2: interview and background audit.
- 118.Schedule and record the applicant interview.
- 119.Proceed to Phase 3: physical or virtual home inspection.
- 120.Record the structured inspection outcome.
- 121.If Home Inspection Approved is reached for a specific dog, verify that the exclusivity lock prevents secondary applications for that dog from proceeding.
- 122.Complete Phase 4: approval and digital adoption lease signing.
- 123.Complete Phase 5: dog handover and certificate issuance.
- 124.Create/maintain Phase 6 follow-up logs for 30, 90, and 180 days.

8.2 Conduct Applicant Screening and Inspection

Capture the screening matrix and inspection evidence.

Step-by-Step Procedure

- 125. Review residential ownership status (Owned/Rented).
- 126. Verify landlord approval documentation when applicable.
- 127. Review yard/fencing information.
- 128. Record household member count.
- 129. Review existing pet medical records where provided.
- 130. Record pet-care experience.
- 131. Record structured interview and home-inspection findings.
- 132. Save the outcome and advance/reject according to the workflow state.

8.3 Complete Approval and Follow-Up

Finalize a safe, auditable adoption.

Step-by-Step Procedure

- 133. Confirm required vetting phases are complete.
- 134. Confirm medical clearance is present for the dog.
- 135. Generate/populate the legal adoption agreement, liability waiver, and applicable fee receipt through the supported workflow.
- 136. Complete the dog handover and certificate issuance.
- 137. Schedule the 30-, 90-, and 180-day follow-up tasks.
- 138. Record each post-adoption check-in and supporting photo/video proof where applicable.

9. Foster Coordinator

Onboards foster parents, conducts home inspection audits, tracks placements, and provides/allocates supplies.

Role Responsibility	Operational Boundary
Foster Module	Read/write access.
Foster Home Inventory Allocation	Read/write access.

9.1 Qualify and Maintain Foster Homes

Maintain the approved foster-home directory.

Step-by-Step Procedure

- 139. Open the foster qualification workflow.
- 140. Review the foster home setup and capability information.
- 141. Record preference tags such as pups, medical recovery, behavior modification, or senior dogs where applicable.
- 142. Record active capacity and availability.
- 143. Complete the required home inspection audit.
- 144. Confirm the foster home is appropriately qualified before placement.

9.2 Create a Foster Placement

Link an eligible dog to an approved foster parent.

Step-by-Step Procedure

- 145. Open the eligible dog profile.
- 146. Select an approved foster home with suitable capacity and capability.
- 147. Create the placement link.

- 148. Record supply requirements.
- 149. Dispatch/allocate food, crate, medication, or other supported supplies.
- 150. Verify the active placement and supply record.

9.3 Monitor Foster Progress and Transition

Oversee the placement through the foster workflow.

Step-by-Step Procedure

- 151. Review daily foster progress records submitted through the caregiver portal.
- 152. Review weight, behavior, medication verification, and media updates as applicable.
- 153. Address placement issues through the supported operational workflow.
- 154. When foster-to-adopt is appropriate, initiate the transition workflow.
- 155. Verify that legal lease generation and required placement records are completed.

10. Volunteer Coordinator

Manages volunteer registration/vetting, activity schedules, shelter duty allocation, and shift attendance.

Role Responsibility	Operational Boundary
Volunteer Module	Read/write access.
Shift Logs	Read/write access.
Certification Modules	Read/write access.

10.1 Onboard and Vet Volunteers

Process volunteer registration and skills information.

Step-by-Step Procedure

- 156. Open the volunteer registration/application record.
- 157. Review emergency contact information, background-check information, medical information captured by the application, animal-handling experience, and specialized skills.
- 158. Verify required onboarding information.
- 159. Record the appropriate vetting/approval state using the supported workflow.
- 160. Ensure the approved volunteer's skills/capabilities are available for scheduling.

10.2 Schedule and Allocate Volunteer Duties

Create volunteer shifts and manage capacity.

Step-by-Step Procedure

- 161. Open the shift scheduling interface.
- 162. Create/post a shift for the relevant branch and operational role.
- 163. Set the schedule and capacity supported by the system.
- 164. Review volunteer self-registration or assignment activity.
- 165. Allocate duties to appropriate volunteers where the coordinator workflow requires it.
- 166. Monitor capacity and attendance records.

10.3 Monitor Attendance and Certificates

Maintain verified service records.

Step-by-Step Procedure

- 167. Open shift attendance records.
- 168. Review check-in/check-out activity.

- 169. Review volunteer hours and duty performance information available to the coordinator.
- 170. Resolve or escalate attendance exceptions according to the operational workflow.
- 171. Use verified service information for service-certificate generation where supported.

11. Inventory Manager

Maintains stock, medical/food supply orders, expiry controls, vendor records, and warehouse audits.

Role Responsibility	Operational Boundary
Inventory	Read/write access.
Requisitions	Read/write access.
Vendor Logs	Read/write access.
Warehouse Audits	Read/write access.

11.1 Catalog and Maintain Stock

Maintain the central stock item catalog.

Step-by-Step Procedure

- 172. Open the inventory catalog.
- 173. Create or update stock records within the authorized workflow.
- 174. Classify items such as pharmaceuticals, vaccines, surgical consumables, dog food, sanitation supplies, capture gear, or office supplies.
- 175. Record required inventory details and vendor information.
- 176. Verify the item is available for stock movement tracking.

11.2 Record Stock Movement

Maintain an auditable record of inventory movement.

Step-by-Step Procedure

- 177. Open the stock movement workflow.
- 178. Record stock arrivals.
- 179. Record internal transfers between facilities.
- 180. Record consumption/usage updates.
- 181. Link usage to medical treatments or shelter care logs where the workflow supports it.
- 182. Verify stock balances after the movement.

11.3 Manage Reorder and Expiry Controls

Prevent stock shortages and expired medical items.

Step-by-Step Procedure

- 183. Review low-stock alerts against safety-stock thresholds.
- 184. Review expiry alerts, including the PRR example of a 60-day warning for medical items approaching expiry.
- 185. Create/route a requisition or purchase action through the supported workflow.
- 186. Update stock status after receipt and movement.
- 187. Verify that expiry and reorder states are current.

12. Finance User

Records expenses, reconciles income, generates donor receipts, and processes refunds.

Role Responsibility	Operational Boundary
Financial Ledgers	Read/write access.
Donation Reconciliation	Read/write access.
Expense Modules	Read/write access.

12.1 Record an Operational Expense

Record expenses in the operational ledger.

Step-by-Step Procedure

188. Open the expense module.
189. Enter the expense supported by the source documentation.
190. Classify the expense category, such as veterinary bills, inventory purchases, fuel/vehicle maintenance, shelter repairs, or transport fees.
191. Tag the expense to the relevant rescue case number or shelter facility when required.
192. Save the transaction.
193. Verify the ledger reflects the recorded expense.

12.2 Reconcile Donations and Generate Receipts

Maintain financial transparency for contributions.

Step-by-Step Procedure

194. Open the donation reconciliation workflow.
195. Review successful contribution transactions.
196. Reconcile the transaction against the financial record.
197. Generate the compliant tax-deductible receipt where applicable.
198. Verify the receipt is associated with the correct donor/contribution.

12.3 Process a Refund

Handle refunds through the authorized finance workflow.

Step-by-Step Procedure

199. Open the transaction requiring a refund.
200. Review the transaction details and applicable refund information.
201. Process the refund using the supported finance action.
202. Record the resulting financial state.
203. Verify the ledger/reconciliation reflects the refund.

13. Volunteer

Performs duty acceptance, shift check-in/out, activity logging, and shelter feedback. The role has self-service access to assigned shifts, activity history, and the volunteer profile.

Role Responsibility	Operational Boundary
Self-service shifts	View assigned/relevant shifts and accept duties as permitted.
Attendance	Check in and check out for own shifts.
Activities	Log/view own activity history through supported volunteer workflows.
Feedback	Submit shelter feedback.
Profile	View the volunteer's own profile.

13.1 View and Accept a Shift

Use the self-service shift workflow.

Step-by-Step Procedure

- 204. Open the Volunteer dashboard and review assigned or available shifts provided for the account.
- 205. Open a shift to review the duty, location, date, time, and other available details.
- 206. Accept/join the duty when the account is eligible and the shift has capacity.
- 207. Verify that the shift status changes to reflect the accepted/claimed state.
- 208. If the account is not eligible, follow the displayed application/approval requirement rather than bypassing it.

13.2 Check In and Check Out

Record attendance for the volunteer's own duty.

Step-by-Step Procedure

- 209. Open My Attendance or the relevant shift attendance record.
- 210. Confirm the shift is the correct duty before checking in.
- 211. Check in using the available attendance action.
- 212. Complete the duty.
- 213. Open the same attendance record and check out.
- 214. Enter activity/work notes and hours information when the workflow requests them.
- 215. Verify that attendance and service history are updated.

13.3 Record and Review Volunteer Activity

Maintain the volunteer's activity/service history.

Step-by-Step Procedure

- 216. Open the activity/history area.
- 217. Record volunteer activity using the activity logging capability provided by the system.
- 218. When activity is captured through duty completion/attendance checkout, enter complete notes and hours information.
- 219. Save the activity record.
- 220. Review the resulting activity history and service information.

13.4 Submit Shelter Feedback

Provide operational feedback through the supported feedback workflow.

Step-by-Step Procedure

- 221. Open Shelter Feedback.
- 222. Select the applicable shelter/service context where provided.
- 223. Complete the feedback form, including rating/category/comment fields supported by the system.
- 224. Review the information before submission.
- 225. Submit the feedback.
- 226. Verify the submission confirmation/status.

13.5 View Volunteer Profile

Review the volunteer's own profile information.

Step-by-Step Procedure

- 227. Open My Profile.
- 228. Review contact information, emergency contact, skills, qualifications, availability, and current status where available.
- 229. Confirm the information belongs to the authenticated Volunteer account.
- 230. If profile editing is explicitly enabled by the system for the Volunteer, update only permitted fields.

231. Save and verify the updated profile state.

14. Foster Family

Provides daily progress reporting, medical symptom uploads, supply requests, and status updates for assigned foster dogs.

Role Responsibility	Operational Boundary
Assigned foster dogs	Self-service access to assigned dog profiles.
Daily logs	Self-service daily progress reporting.
Veterinary support	Access to veterinary support chat/workflow as supported.

14.1 Review an Assigned Foster Dog

Use the foster portal to monitor assigned animals.

Step-by-Step Procedure

232. Open the assigned foster dog profile.

233. Review current care information and relevant status.

234. Confirm the dog is the correct assigned animal before entering updates.

14.2 Submit Daily Progress

Record daily foster observations.

Step-by-Step Procedure

235. Open the daily progress form.

236. Record weight information.

237. Record behavioral observations.

238. Complete medication verification/check-in where applicable.

239. Attach permitted media when required.

240. Submit the daily progress record.

241. Verify the record is saved to the assigned foster dog.

14.3 Report Symptoms and Request Supplies

Escalate medical concerns and operational supply needs.

Step-by-Step Procedure

242. Open the medical/symptom reporting workflow for the assigned dog.

243. Record the observed symptom or concern accurately.

244. Submit the update for veterinary/operational review.

245. Open the supply request workflow when food, crate, medication, or other supported supplies are needed.

246. Submit the request and verify its status.

15. Donor

Makes direct monetary contributions, sponsors specific dogs, and accesses tax receipts and contribution information through a self-service portal.

Role Responsibility	Operational Boundary
Contributions	Self-service contribution history.
Sponsorship	Dog-specific sponsorship updates.
Tax documents	Self-service access to tax receipts/documents.

15.1 Make a Donation

Use the donation gateway for a one-time, recurring, or campaign contribution.

Step-by-Step Procedure

- 247. Open the donation gateway.
- 248. Select the contribution type supported by the portal.
- 249. For targeted giving, select the applicable emergency campaign or supported purpose.
- 250. Enter the required contribution information.
- 251. Complete the transaction through the supported payment flow.
- 252. Verify the successful transaction and contribution record.

15.2 Sponsor a Specific Dog

Create or manage a dog-specific sponsorship.

Step-by-Step Procedure

- 253. Open the sponsorship option.
- 254. Select the dog available for sponsorship.
- 255. Choose the supported sponsorship contribution schedule.
- 256. Complete the transaction.
- 257. Review sponsorship updates in the donor self-service portal.

15.3 Access Tax Receipts and Contribution History

Maintain access to donor records and tax documents.

Step-by-Step Procedure

- 258. Open contribution history.
- 259. Locate the relevant successful transaction.
- 260. Open the associated tax receipt/document where available.
- 261. Download the tax document using the portal's document action.
- 262. Review sponsorship updates and contribution history as required.

16. General Public User

Uses the public-facing portal for emergency incident reporting, adoption applications, lost/found postings, and general inquiries.

Role Responsibility	Operational Boundary
Public interface	Access to public service functions.
Personal dashboard	View submitted cases/applications.

16.1 Report an Emergency Rescue Incident

Submit a street-level animal emergency through the multi-step public reporting wizard.

Step-by-Step Procedure

- 263. Open the Emergency Rescue Portal.
- 264. Enter reporter identity information or select the anonymous option where available.
- 265. Provide primary/alternate contact and email information as applicable.
- 266. Capture or enter the incident street address, nearest landmark, and GPS location.
- 267. Enter the estimated number of dogs involved.

- 268. Select the observed physical condition category.
- 269. Record behavior/aggressiveness indicators.
- 270. Upload up to 5 photos and short video clips within the PRR's combined 50MB limit.
- 271. Add temporal/environmental details and reporter notes.
- 272. Submit the incident.
- 273. Save the unique rescue tracking key provided by the system.

16.2 Apply to Adopt

Submit an adoption application for an available dog.

Step-by-Step Procedure

- 274. Open the public adoption directory.
- 275. Search/filter for an adoptable dog.
- 276. Open the dog's profile and review available information.
- 277. Select the adoption application action.
- 278. Complete the required applicant information.
- 279. Provide the screening information requested by the application.
- 280. Submit the application.
- 281. Use the personal dashboard to review the submitted application/case where supported.

16.3 Post a Lost or Found Report

Create a public lost/found record.

Step-by-Step Procedure

- 282. Open the Lost and Found Portal.
- 283. Select Lost Pet or Found Animal.
- 284. Enter the location and date.
- 285. Provide physical identifying markers, collar/tag details, and microchip information when available.
- 286. Submit the posting.
- 287. Review any matching indicators or follow-up requests provided by the platform.

16.4 Submit a General Inquiry

Use the public contact/inquiry channels.

Step-by-Step Procedure

- 288. Open the Contact/Emergency Hotline or inquiry interface.
- 289. Select the relevant contact/service channel.
- 290. Provide the requested inquiry information.
- 291. Submit the inquiry.
- 292. Retain any reference or response information provided by the portal.

17. Cross-Role End-to-End Workflow Guides

These workflows show how role responsibilities connect. They do not replace role permissions; each step must be performed by the role assigned by the PRR.

17.1 Rescue from Public Report to Shelter Admission

Stage	Primary Role	Operational Step	Result
1. Report	General Public User / Field Team	Submit required incident, location, animal, media, and notes.	REPORTED
2. Verify	Rescue Coordinator	Review authenticity/location and accept or reject.	VERIFIED or REJECTED

Stage	Primary Role	Operational Step	Result
3. Dispatch	Rescue Coordinator	Assign agent, vehicle, and equipment.	DISPATCHED
4. Locate	Rescue Agent	Confirm visual contact and record field observations.	LOCATED
5. Rescue	Rescue Agent	Secure animal and record outcome.	RESCUED
6. Admit	Rescue Agent + Shelter Manager	Complete transport and shelter receipt.	ADMITTED; Dog Master Profile created

17.2 Medical and Adoption Readiness

293.Shelter Manager records intake and current location.

294.Veterinarian performs clinical intake examination.

295.Veterinarian records treatment, surgery, preventative care, and medication as applicable.

296.Veterinarian completes the formal adoption medical clearance when the dog is clinically eligible.

297.Adoption Coordinator uses the cleared dog in the controlled adoption pipeline.

17.3 Adoption Pipeline

298.Applicant submits an application.

299.Adoption Coordinator completes document and identity verification.

300.Adoption Coordinator performs interview and background audit.

301.Adoption Coordinator completes physical or virtual home inspection.

302.Once Home Inspection Approved is reached for a dog, the exclusivity lock prevents secondary applications from proceeding.

303.Approval and digital lease signing are completed.

304.Dog handover and certificate issuance are completed.

305.30-, 90-, and 180-day post-adoption audits are recorded.

18. Operational Data Reference

18.1 Rescue Intake Minimum Data

Data Group	Required Information from PRR
Reporter Identity	Full name, primary phone, alternate contact, email, anonymous flag option
Incident Location	Street address, nearest landmark, GPS coordinates
Animal Details	Estimated number, physical condition category, aggressiveness/behavior indicators
Media Evidence	Up to 5 photos and short video clips; maximum 50MB combined
Temporal Tracking	Automated submission timestamp, environmental factors, additional notes

18.2 Rescue Status Lifecycle

Status	Meaning / Responsible Event
REPORTED	Initial public/field receipt
VERIFIED	Coordinator confirmed authenticity and location
DISPATCHED	Field agent and vehicle assigned and en route
LOCATED	Field agent confirmed animal visual contact on site
RESCUED	Animal successfully secured in rescue vehicle
ADMITTED	Transport complete; animal safely received at designated shelter

Status	Meaning / Responsible Event
REJECTED	Invalid, duplicate, or unlocatable report; mandatory rationale log

18.3 Dog Master Profile

- System identifiers: unique dog registration number, linked rescue case number, microchip ID.
- Visual attributes: high-resolution photo gallery, primary identification markers, coat color, ear shape, tail type.
- Demographics: name, breed classification, estimated age, sex, weight history.
- Location: current shelter facility, section, kennel number, or active foster home ID.
- Behavioral matrix: temperament and safety/compatibility indicators.
- Historical activity stream: immutable chronological record of intake, transfer, medical events, weight measurements, applications, foster placement, and post-adoption inspection.

19. Security, Privacy, Accessibility and Usability

19.1 Security Controls

- Server-side RBAC must enforce role permissions for every request.
- Critical transactions must be audit logged with User ID, timestamp, IP address, action code, and pre/post state.
- Sensitive reporter and donor personal information must be protected; general views should mask phone numbers and home addresses where required.
- File uploads must pass signature, MIME-type, and size validation. The PRR lists JPEG, PNG, PDF, and MP4 as permitted formats.
- Session governance includes token invalidation, inactivity timeouts, secure password rules, and MFA requirements for administrative login accounts.

19.2 Interface Standards

- Professional navy blue base (#1E3A8A), slate backgrounds (#F8FAFC), green positive indicators (#16A34A), and amber/red emergency indicators (#DC2626).
- Use clean sans-serif typography with strong mobile readability.
- All public and field-agent interfaces should adapt across mobile, tablet, and desktop.
- Data grids should use high-contrast text, zebra striping, explicit status badges, and sticky headers.
- Field-facing forms should use touch-optimized controls for single-handed use.

20. Operational Troubleshooting and Escalation

Issue	First Action	Escalation / Next Role
Rescue report appears invalid or duplicate	Do not dispatch; review required evidence and rationale.	Rescue Coordinator
Field rescue cannot be completed	Record standardized failure outcome and field notes.	Rescue Coordinator / escalation workflow
Emergency backup is required	Use field escalation trigger.	Rescue Coordinator / emergency support
Dog medical condition requires clinical action	Record/route the case through medical workflow.	Veterinarian
Kennel capacity or sanitation issue	Review kennel map and sanitation state.	Shelter Manager
Adoption vetting issue	Keep application in correct phase and record findings.	Adoption Coordinator
Foster placement/supply issue	Review placement and supply allocation record.	Foster Coordinator
Volunteer registration or scheduling issue	Review volunteer/shift workflow.	Volunteer Coordinator

Issue	First Action	Escalation / Next Role
Stock shortage/expiry concern	Review inventory alerts and requisitions.	Inventory Manager
Financial discrepancy	Review ledger and reconciliation record.	Finance User / Rescue Centre Admin
Access/permission problem	Do not bypass RBAC; record the issue.	Super Administrator / authorized administrator

21. Role Readiness and Acceptance Checklist

Use this checklist during role onboarding, UAT, and operational handover. The PRR's final acceptance requires end-to-end workflow validation, RBAC integrity, and a performance benchmark of page loads under 2 seconds across standard web/mobile connections with real-time dashboard updates.

Check	Expected Result
Correct role login	User lands in the role-tailored experience.
RBAC	Restricted roles cannot access higher-tier operational views or administrative endpoints.
Data visibility	User sees only information authorized for the role.
Core workflow	Role can complete each PRR-defined responsibility supported by the platform.
Auditability	Critical transactions are traceable through audit records.
Responsive use	Public and field-agent interfaces work on mobile, tablet, and desktop.
Data integrity	Rescue lifecycle, Dog Master, medical, shelter, adoption, and financial records remain consistent.
Adoption exclusivity	No adoptable dog is simultaneously assigned to multiple approved applications.
Performance	Page load target under 2 seconds across standard web/mobile connections; dashboards support real-time operational updates.

22. Source, Governance and Change Control

This User Operations Manual is derived from the Project Requirement Report PRR-PAWGUARD-2026-V1, issued July 27, 2026. The PRR states that it represents the official functional scope and business expectations of PawGuard.

Source Coverage Used in This Manual

PRR Area	Manual Coverage
2.1 Role & Permission Matrix	Role responsibilities and access boundaries for all 15 roles
3.2 Emergency Rescue Request & Incident Intake	Public incident reporting, lifecycle, required intake data
3.3 Rescue Team & Dispatch Operations	Rescue Coordinator and Rescue Agent field procedures
3.4 Dog Profile & Lifecycle History	Dog Master reference and data elements
3.5 Medical, Surgical & Veterinary Suite	Veterinarian procedures
3.6 Shelter & Capacity Management	Shelter Manager procedures
3.7 Adoption Management & Vetting	Adoption Coordinator procedures
3.8 Foster Home Management	Foster Coordinator/Foster Family procedures
3.9 Volunteer Management	Volunteer Coordinator and Volunteer procedures
3.10 Lost and Found	General Public lost/found workflow
3.11 Finance & Donations	Finance User and Donor procedures

PRR Area	Manual Coverage
3.12 Inventory	Inventory Manager procedures
3.13 Vehicle & Equipment	Referenced within rescue/dispatch responsibilities
3.14 Complaints, Feedback & Service Assurance	Feedback and escalation reference
4. Reporting & Analytics	Role/reporting context
5. UI/Design	Usability/accessibility guidance
6. Security & Compliance	RBAC, audit, privacy, uploads, session governance
7. Deliverables & Acceptance	Manual purpose, UAT, RBAC, performance, end-to-end acceptance
